

Laravel Vapor

내 돈 내고 (8시간) 써본 솔직 후기

이현석

Incredible scale without breaking a sweat.

Laravel Vapor is a **serverless deployment platform** for Laravel, powered by AWS. Launch your Laravel infrastructure on Vapor and fall in love with the scalable simplicity of serverless.

Your email

Request Early Access

On-demand auto-scaling with zero server maintainance.

You have to see it to believe it. Watch your web application and workers scale within seconds based on demand.

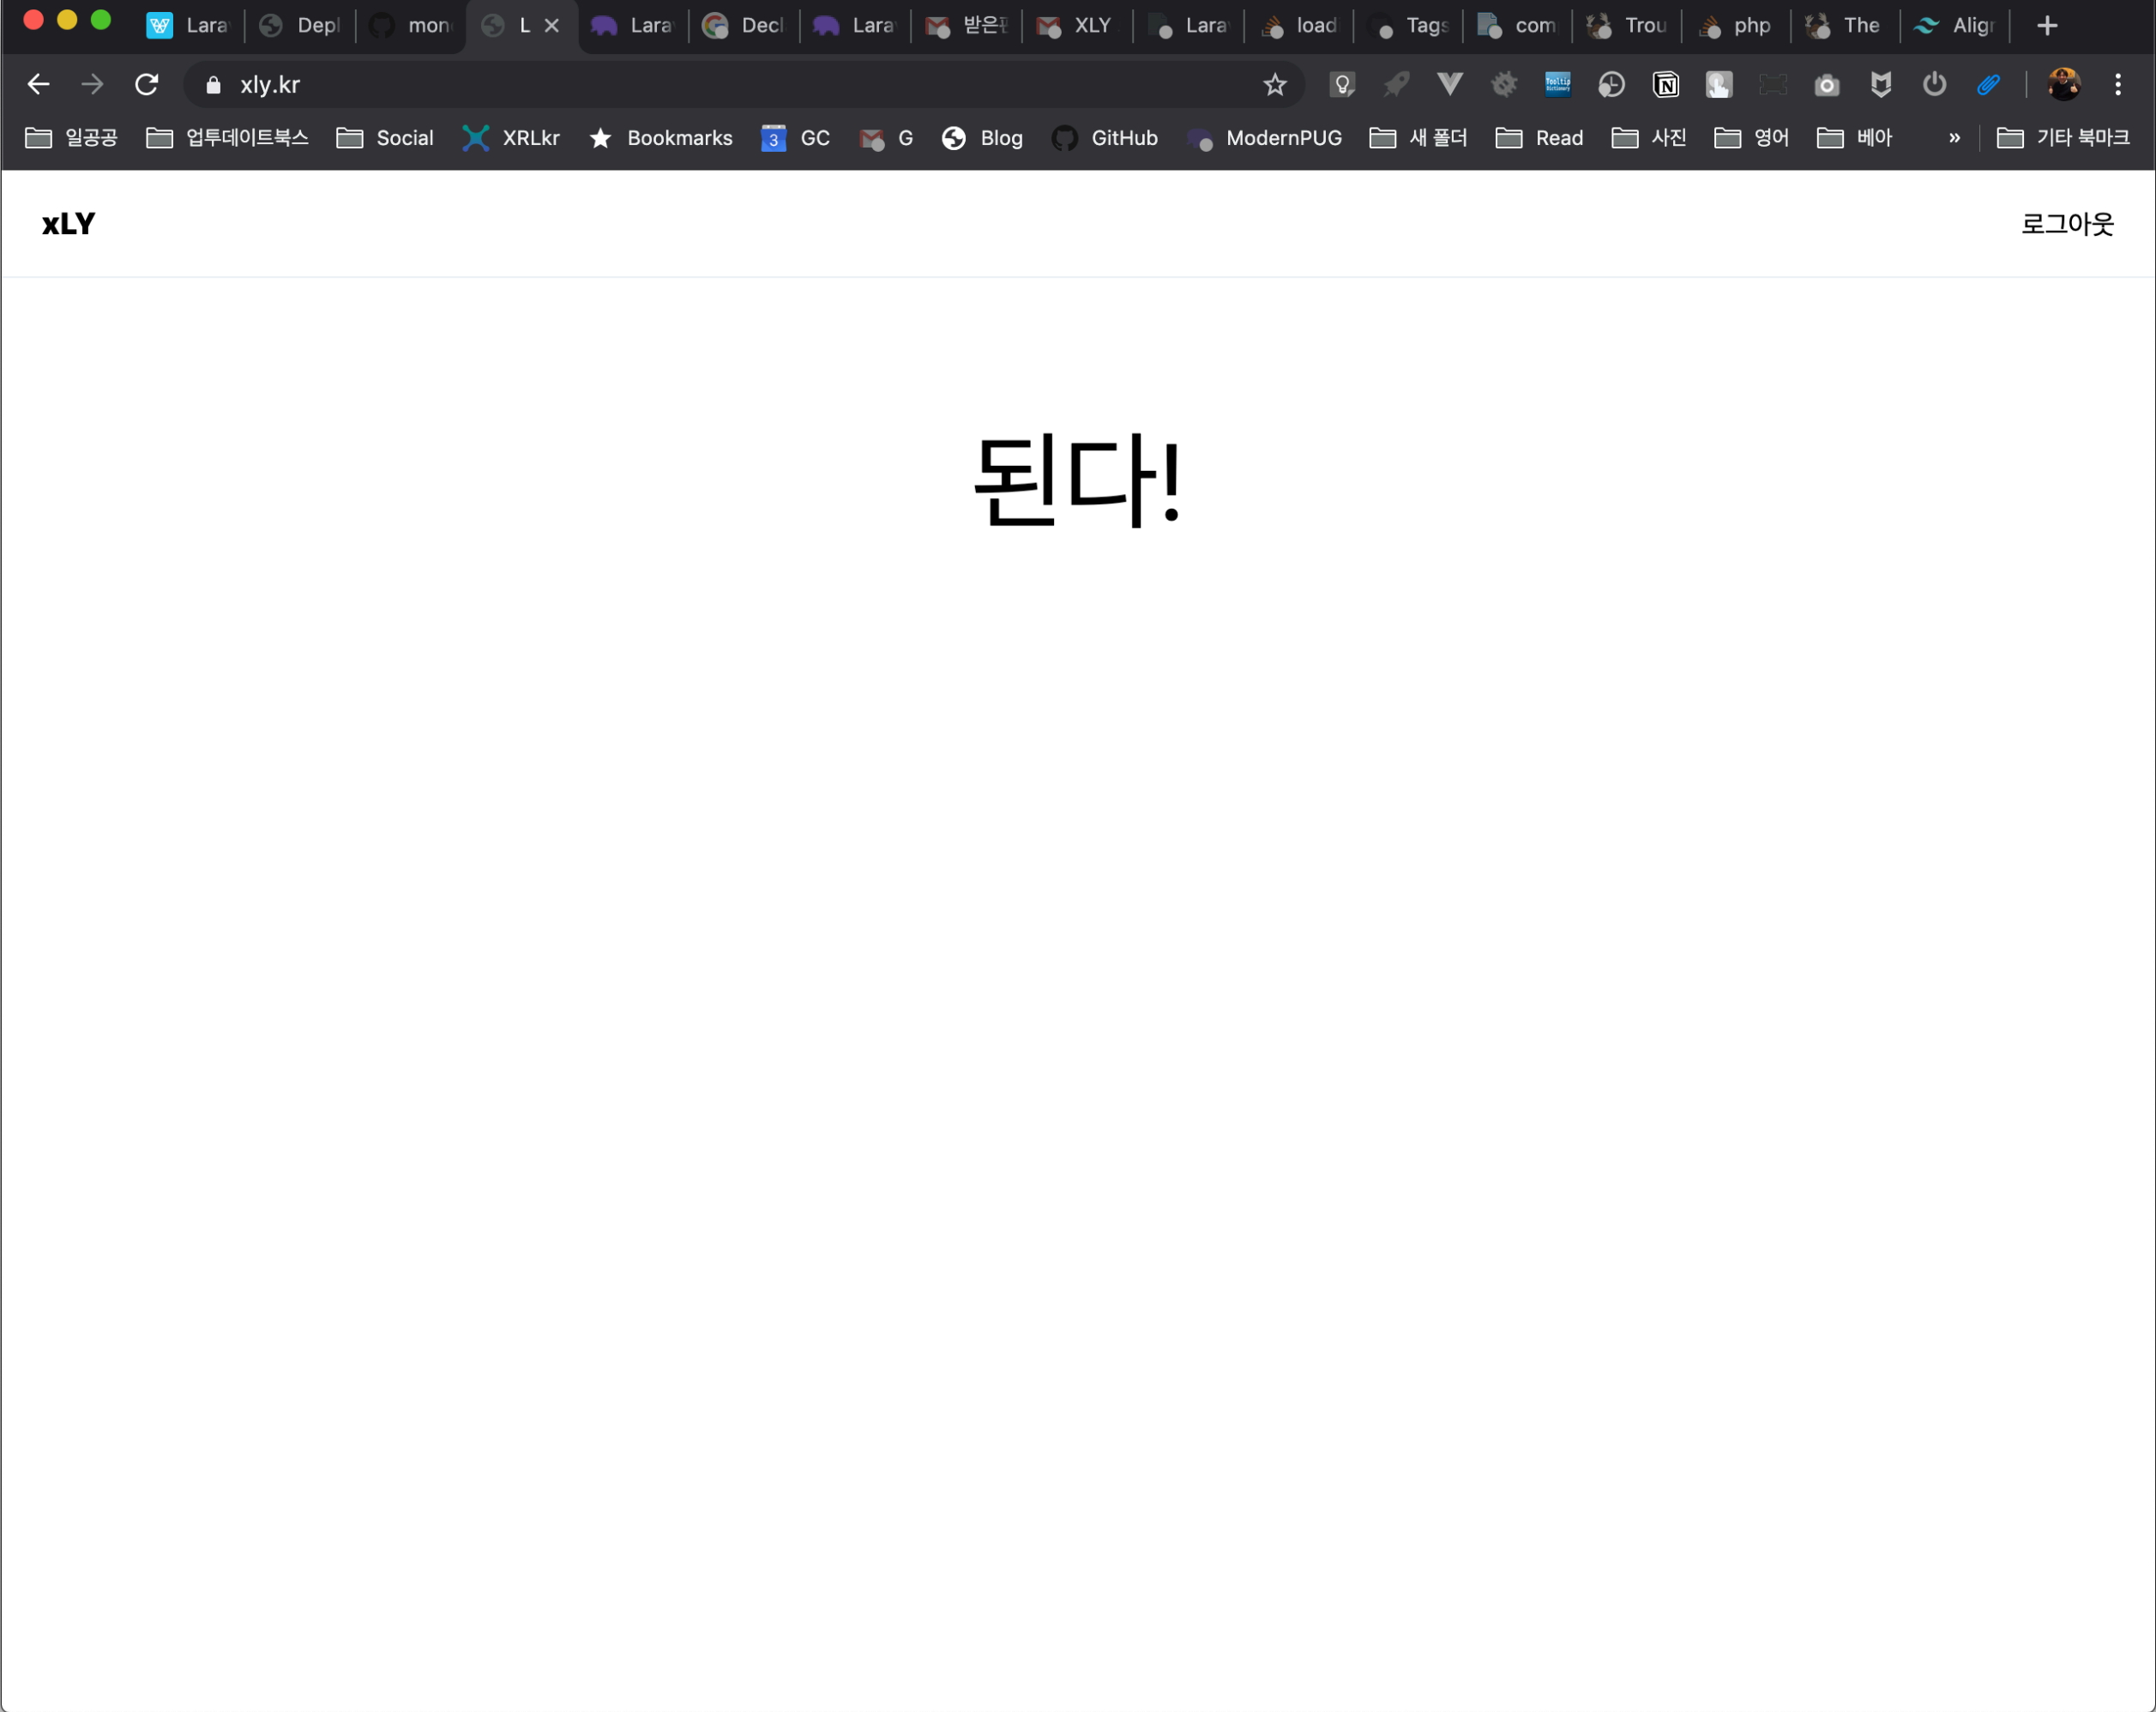

Databases

Vapor isn't just about deployments. Create, manage, scale, and even restore your traditional and serverless databases directly from Vapor's intuitive dashboard.
